

## Newington and the Queen's Green Canopy

Newington Parish Council organised the planting of nine beautiful Crab Apple trees to celebrate the Queen's Platinum Jubilee, and they will form part of the Queen's Green Canopy, a nationwide initiative.

More than a dozen villagers came together to have fun planting the trees, which can be seen around the Millennium Stone on the A329 in Newington. The trees are *Malus Sylvestris* which are native to Britain and should have lovely blossom in the spring, that people and pollinators alike will enjoy, and crab apples in the autumn that wildlife love.
